

DATASHEET

IMO Core

Make the most of valuable EHR data

EHR promise vs. practice

As the healthcare industry evolves, clinicians face significant barriers to delivering better care. Documentation can be overwhelming and often distracts from important face time with patients. Despite their potential, EHRs can seem more like transactional workflow tools, not robust clinical documentation systems. And the potential inefficiencies of EHRs means precious time can be wasted on data inconsistencies and manual workarounds.

The EHR has great promise as a platform that could synthesize individual and collective patient data to uncover insights and improve patient care. But in reality, inaccessible data often impedes clinical decision making which is bad for patients, clinicians, and the healthcare systems they practice in.

The IMO alternative

IMO Core is a clinical interface terminology (CIT) solution that includes a suite of tools to enhance problem list management in the EHR. It improves workflows and ensures accurate documentation so clinicians can focus on care, not coding and reimbursements.

IMO Core helps you:

1

Deliver better, more intentional care

- Dictionary is curated by clinical SMEs
- Provides a simple, organized view of the patient problem list

2

Document more credibly

- Aligns clinical language with rigid coding systems
- Continually updated to be compliant with health system and regulatory requirements

3

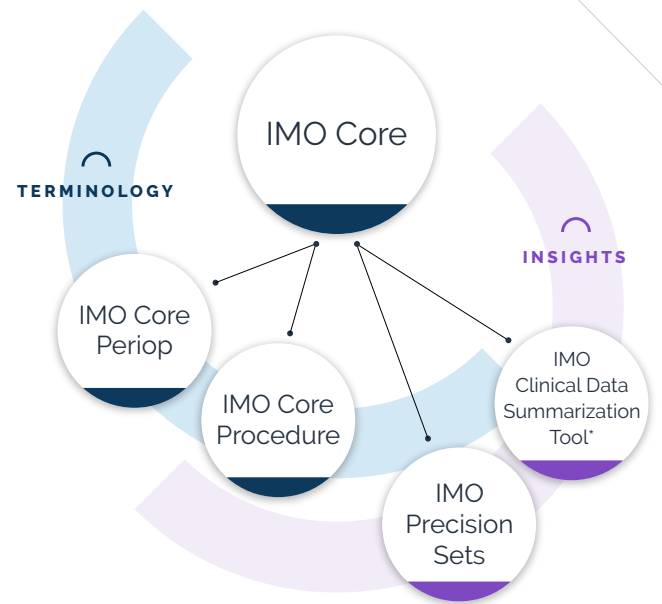

Operate more efficiently

- Prioritizes contextually-relevant patient problems
- Highlights duplicate and outdated data from patient problem list

Terminology and insights

Our industry-leading clinical interface terminology (CIT) solutions form the foundation of the IMO platform. IMO Core solutions provide clinically-validated, continuously updated, curated content and intuitive workflow applications. IMO Precision solutions leverage the power of our Core offerings to deliver content, software, and services that provide more precise analysis and reporting of data – from patient to population.

* IMO Clinical Data Summarization Tool is not available for any use, commercial or non-commercial. Information regarding potential future products is intended to outline our general product direction and it should not be relied on in making a purchasing decision. IMO Clinical Data Summarization Tool is not a formal, commercially-approved IMO product name.

IMO SOLUTIONS SUITE

IMO Core

A clinical interface terminology (CIT) solution to better manage diagnoses and patient problem lists

IMO Core Periop

A CIT solution that maintains the procedures in your surgical dictionary to optimize your operating room

IMO Core Procedure

A CIT solution that maps procedure terms to appropriate billing and reference codes

IMO Precision Sets

Up-to-date value sets for better quality reporting and understanding of patient cohorts

Intelligent Medical Objects

At IMO, we are dedicated to powering care as you intended, through a platform that is intelligent, intuitive, and intentional. We offer a portfolio of products that includes terminologies and value sets that are clinically-vetted, always current, and maintenance-free. This aligns to provider organizations' missions, EHR platforms' inherent power, and the evolving vision of the healthcare industry while ensuring accurate care documentation and administrative codes. So clinicians can get back to being clinicians, health systems can get reimbursed, and patients can more easily engage in their own care. As intended.

To learn more about how IMO Core can help your organization unlock new value from your EHR, contact us at sales@e-imo.com or **847-272-1242**.
